

Postcode changes in Norway 2025/10/01

Layout description and user manual for the conversion table

Contain

1. Generally about implementation of postcode changes
2. Description of the changes 2025
3. Changes in the Postcode table
 - 3a Changes before the conversion of addresses can start
 - 3b Changes after the conversion of addresses
4. Conversion table with single addresses and
4a Field Descriptions

1. Generally about implementation of postcode changes

Posten Bring follow the Norwegian guidelines for postal code changes. Changes where mail recipients are affected is only affected once a year and the date is the 1st of October. Other corrections (e.g. errors) can be performed throughout the year. New postcodes can also be created throughout the year to be used on new addresses.

Implementation occurs in three steps:

1. Approximately the 15th of sept the postcode table are updated with new postcodes
2. In week 39 we publish information on our websites about affected addresses and their changes
3. Approximately the 1st of oct the postcode table are updated once more, now with changes you can implement after the addresses are updated

Bring sends information mails about this.

For more information, please contact Bring Customer service at www.bring.com.

2. Description of the postcode changes 2025

The file Postcode changes table 2025.xls is located on the same web page as the conversion table and is to be used as a supplement to the conversion table. The Excel file contains a description of the changes for each postcode and they are separated in different types. You can find the descriptions in the bottom of the Excel-file Postcode changes table 2025.xls.

3. Changes in the postcode table

You must update your Postal code table before you can convert the addresses into the new postal codes. And after conversion it is some few more changes in the postal code table.

3.a Changes before the conversion of addresses can start

This is the changes in the postal code table and you have to implement these in your postcode table before you change the postcode on your addresses:

2 postcodes are new and for use to Street addresses (Category G):

- 4075 STAVANGER
- 8845 SELØY

In addition to the new postcode table is the log of all new postcode and the log of all changes and ceased postcode is updated. The logs are in order by date.

A new postcode registry and change files will be made available for download approximately 1st of October.

3.b Changes after the conversion of addresses

This is the changes in the Postal code table that can be implemented after conversion of the addresses into the new postal codes:

17 postcodes is no longer in use and can be removed:

- 8128 YTRE BEIARN
- 0128 OSLO

| • 9119 SOMMARØY | changes to | 9119 SOMMARØYA |
| • 9141 MJØLVIK | changes to | 9141 MELVIKA |

9 postcode change category of use:

All postal codes changes category of use from B (both Street addresses and P.O.Boxes) to G (Street addresses)

- 3095 EIDSFOSS
- 4863 NELAUG
- 5075 BERGEN
- 5582 ØLENSVÅG
- 6298 ONA
- 8880 BÆRØYVÅGEN

In addition to the new postcode table is the log of all new postcode and the log of all changes and ceased postcode is updated. The logs are in order by date.

A new postcode registry and change files will be made available for download approximately 1st of October.

4. Conversion table

The Posten Brings own address register is the basis for this table.

The conversion table contains addresses that are affected by postcode changes 1st of October, ref the excel-file "Post codes changes table 2025"

The conversion table contains even all addresses with changed postcode last year (due errors).

If only a part of a street or P.O. Box system changes postcode, only that part will be listed in the conversion table.

The 2025-conversion table contain **4.152 addresses/records**

4.a Field Descriptions

1 Category:

Refers to the type of change in the file Postcode changes table 2025.xlsx
Either two digits or "Logg" if changed since last 1.10.

2 Code categories:

Code category tells what type of address that it is referred to.
Can contain the following categories.

'GV' = Street address

'ST' = Place addresses (Used on smaller places that don't have street addresses)

'PS' = Post place addresses (Used on smaller places that even don't have place addresses)

'PB' = P.O. Box address

**3 Municipality number:**

Official municipality code. (4 digits where the first two digits refer to the county).

4 Street code:

The official code for a street. The street code is unique in combination with the Municipality number.

The field is blank for place addresses, post place addresses and P.O. Box addresses.

5 Street name:

Name of a street. If it is place address (ST in the category code) it contains the place name and the field is blank if it is a postcode address. If it is a P.O. Box address (PB category code) it contains the word "POSTBOKS".

6 House number:

Contains the house number of a street address and the P.O. Box number if PB in category code. The field is blank if it is a place address or a post place address.

7 Letter:

Contains the letter of a street address, if the house number is: Ex: 2A, 2B. Only one letter is used in Norway now.

8 Entrance:

«Entrance» is no longer in use in addresses in Norway and the field is blank.

9 Old P.O. Box-office:

Contains the old name of the P.O. Box office. The name of the P.O. Box office can for example be "MAJORSTUA". This is important where multiple P.O. Box offices share the same postal city name and is especially important where multiple P.O. Box offices share the same postal code.

10 Old post code:

Contains the correct old postcode.

11 Old postal city name:

Contains the correct old postal city name.

12 New P.O. Box office:

Containing the new name of the P.O. Box office, for example «MAJORSTUEN»

13 New Postcode:

Contains the correct new postcode.

14 New postal city name:

Contains the correct new postal city name.

15 Reason code1:

Tells about the POSTCODE - BEFORE the changes. May contain 4 different variants:

- **ALLE:** Here all addresses in your address register that have postcode "Postnummer gammelt" are either change postcode to "Postnummer nytt", cityname to "Poststedsnavn nytt" or P.O. Box name to "Postbokskontor nytt". Or several kind of changes.
- **PBOK:** Postcode changes for P.O. Box addresses. If a postcode has both street addresses and P.O. Box addresses but the P.O. Box addresses get a new own postcode, shall the street addresses keep the old postcode. If you have addresses in your registry that contains the postcodes in "Postnummer gammelt", therefore check if there is a P.O. Box address and the P.O. Box number is the same as that in the table, and change it to the "Postnummer nytt". Also remember to change the postal city name to "Poststed nytt" and check the value that is in "Postbokskontor nytt". Important: Keep the old postcode on addresses wich not are P.O. Box addresses or P.O. Box addresses that not are listed in the conversion table.
- **NAVN:** Only the postal cityname changes. If you have addresses in your registry with postcode like "Postnummer gammelt", the postcode retained, but the post cityname must be changed to "Poststed nytt».
- **BLOK:** This reason code tells that only some addresses with the postcode is changed. The new postcode can be a brand new postcode or an existing one. If you have addresses in your registry that contains the postcode equivalent to "Postnummer gammelt", you have to check the street address and house number (or place name) what new postcode the address should get.

16 Reason code2:

Tells about the STREET ADDRESSES - AFTER the changes

- **DELT:** After the change there will be a postcode split in this street. It may have been a split on the postcode for this street before the change.
If a street continues into another municipality, it's another street.
- **HELE:** After the change, the whole street has the same postal code. It may have been a split on the postcode for this street before the change.
If a street continues into another municipality, it's another street.
