

# File description

## Street- and Address-register for Norway

Street register	
Position	Field name
1-5	Street code
6-35	Street name
36-39	From building number
40	From letter
41-44	To building number
45	To letter
46-49	Postcode
50-81	City
82-83	Municipality code: County
84-85	Municipality code: Municipality
86-115	Municipality name

The street code is only unique in combination with the municipality code (County+Municipality). Individual street names are distributed across several postcodes. These are distributed by even and uneven building numbers, i.e. 2-4-6-etc. and 1-3-5-etc. For example, the correct postcode for Plogveien 28 in Oslo is 0681, while Plogveien 27 has postcode 0679.

Address register	
Position	Field name
1-14	Address number
15-19	Street code
20-49	Street name
50-53	Property number
54-57	Letter
58-60	Section
61-64	Postcode
65-96	City
97-98	Municipality code: County
99-10	Municipality code: Municipality
101-130	Municipality name

The street code is only unique in combination with the municipality code (County+Municipality). Building number 0000 means that the address point does not have a building number. This value is replaced with blank spaces.

P.O. Box Register	
Posisjon	Feltnavn
1-30	Postboks
31-34	Fra boksnummer
35-38	Til boksnummer
39-68	Postbokskontor
69-72	Postnummer
73-104	Poststed

The P.O.box field will only contain the word "P.O. Box".

Remember that it is often a good idea to combine the Street and Address Register with an updated [Postcode Register for Norway](#).
